

POLYMER CHEMIST

Sensors for Medicine and Science, Inc., a small but growing medical device company, has an opening for a polymer chemist to work at our new research facility in Germantown, Maryland. A Ph.D. in polymer chemistry and a hands-on knowledge of polymer synthesis is required. The scientist should be able to independently design and synthesize polymers with desired chemical and physical properties. Experience in the preparation of polymers for medical devices is a strong plus. Excellent communication skills and the ability to work in a dynamic cross-disciplinary environment are also required. Our small research group provides an excellent opportunity for scientists to make genuine and highly visible contributions in the critical field of glucose monitoring devices.

We offer competitive salaries and benefits. For consideration, please submit your resume electronically to admin@s4ms.com or by mail or fax to:
